

Federal Remediation Technologies Roundtable

FRTR at 30 Years: Grand Challenges and Opportunities for Advancing Remediation Technologies

Summary of Session 1

Heather Henry, NIEHS/SRP

1

The Federal Remediation Technologies Roundtable

You may send your thoughts by email to FRTR@emsus.com by May 31, 2021.

1) Grand Challenges:

What are the grand challenges facing your agency regarding remediation over the next decade?

2) Technology Needs and Research Gaps:

Focusing on specific technology needs, the FRTR has identified these cross-cutting issues going forward:

- Contaminant source and site characterization
- Emerging contaminants
- Remedy resilience under evolving climatic conditions

What are your agency's remediation technology needs or research gaps for these issues? Are there other key issues not captured above?

2

The Federal Remediation Technologies Roundtable

You may send your responses by email to FRTR@emsus.com by May 31, 2021.

3) Advancing New Technologies:

- ✓ What are the main barriers to advancing application of innovative remediation approaches from your agency's perspective?
- ✓ Do you have recommendations for overcoming these barriers and/or incentivizing new technology application?
- ✓ Are you aware of any promising new remediation technologies on the horizon?

4) Initiatives and Coordination:

- ✓ Are there any strategic remediation initiatives/programs underway in your agency for advancing site cleanups?
- ✓ Are you aware of resources, opportunities, or other groups that would enhance FRTR's coordination efforts?

5) Vision for Future of FRTR:

- ✓ What do you see as the key value of the FRTR for your agency, and what would you hope to see FRTR accomplish in the next 5 – 10 years?
