5 Conclusions

# NAVFAC T2 Program Overview

- The NAVFAC Technology Transfer (T2) Program supports information sharing to identify the Navy's Environmental Restoration Program (ERP) challenges and to promote the use of innovative and cost-effective solutions.
- The goal of the T2 Program is to communicate the latest information on research, technology innovations, and lessons learned from Navy case studies.
- Technical information is shared using several methods to reach the target audience of Navy Remedial Project Managers (RPMs) and other key ERP stakeholders.

If you would like to be added to the distribution list, send an e-mail to [EXWC\\_T2@navy.mil](mailto:EXWC_T2@navy.mil) to join.

# NAVFAC T2 Program Process

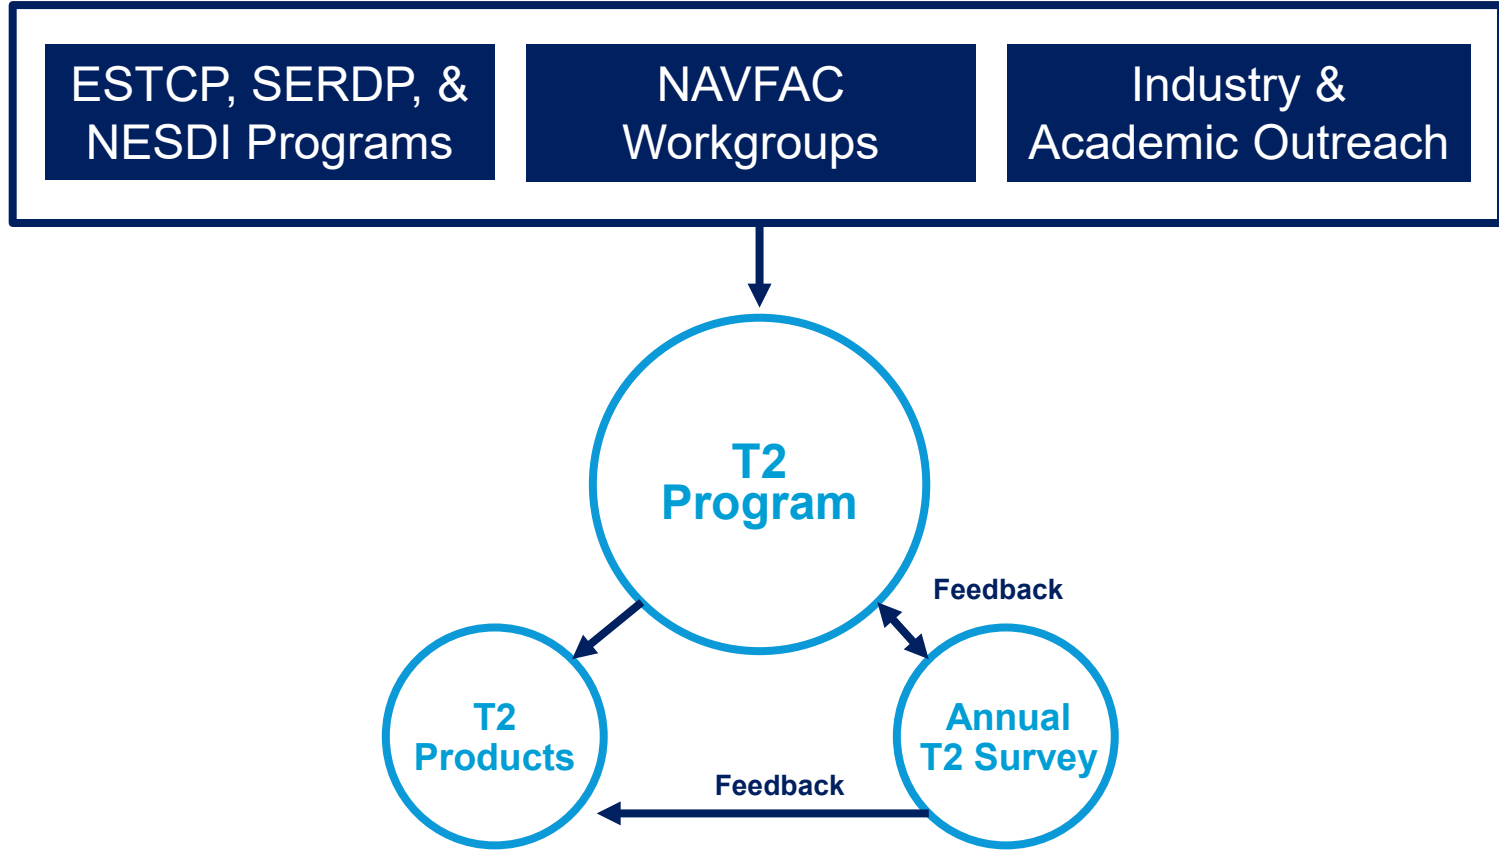

## Objectives

- Transfer information on new technology developments and Navy-sponsored research
- Provide information on cost saving strategies for site cleanup
- Share lessons learned between RPMs

## Approach

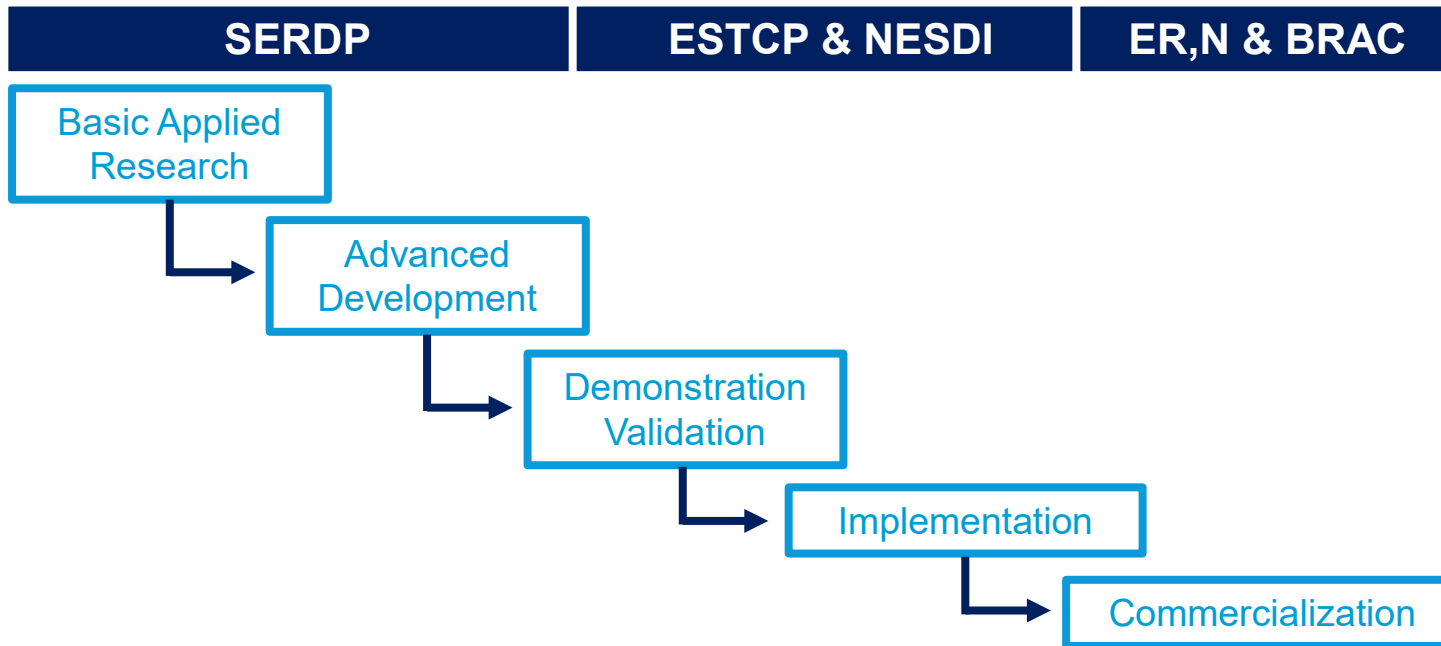

- Technical content driven by RPM needs
- Coordinate T2 needs with NAVFAC Workgroups
- Program seeks two-way information exchange
  - Stakeholder input is key:
    - SERDP/ESTCP
    - Navy Environmental Sustainability Development to Integration (NESDI) Program
    - NAVFAC Workgroup Needs
    - T2 Survey Feedback
- Periodic reporting of milestones and T2 survey results

**DoD/DON ERP Research & Development Structure (NERP, 2018)**

# T2 Program Process: NESDI Input

**NESDI Program Management Process (NESDI, 2021)**

# T2 Program Process: NAVFAC Workgroups

- NAVFAC Workgroups
  - Established to identify and address ERP technical challenges
  - Representatives from NAVFAC HQ, ER Manager Lead, EXWC, and RPMs from each NAVFAC Field Engineering Command (FEC)
- NAVFAC Workgroup Contributions
  - Sharing of best practices
  - Identifying lessons learned
  - Developing NAVFAC guidance
  - Providing input on key topics to the T2 Program

# NAVFAC T2 Methods: Summary

- **NAVFAC Environmental Restoration & BRAC Websites**

- ERB Web Site
- Internal SharePoint
- Social Media (LinkedIn & YouTube)

- **T2 Program Products**

- Fact sheets, technical reports, guidance
- Tools (SiteWise) and checklists

- **Newsletters**

- Monthly T2 e-mail updates
- ERB Garden newsletter articles (internal to Navy)

- **Webinars**

- Open Environmental Restoration Resources (OER2) Webinar Series
  - Open to public; covers remediation practices, tools, technologies, and ways to improve efficiency
- TIPS Forum (internal to Navy)

- **In-Person Training Events**

- Remediation Innovative Technology Seminar (RITS)
- Remedial Project Manager Training Event
- Civil Engineer Officer School (CECOS) Environmental Restoration Training Classes

06 | RPM TRAINING EVENT

07 | CECOS CLASSES

# NAVFAC T2 Methods: RITS

## REMEDATION INNOVATIVE TECHNOLOGY SEMINAR (RITS)

- Held once per year at each FEC to provide training on innovative technologies and guidance updates
- 2-day seminar, 6 topics (3 per day)
- Topics identified by the RITS Team, ER Managers, and NAVFAC Workgroups
- Ongoing program for 20+ years
- In-person classroom training allows in-depth topic coverage
- Direct connection to subject matter experts (SMEs)
- Live demonstrations of technologies

- Average attendance = 250 per year
  - ~45% Contractor
  - ~40% Navy RPMs
  - ~15% Regulators and Other Stakeholders

# NAVFAC Annual T2 Survey

- Issued online and at RITS
- Purpose of T2 survey
  - Obtain RPM feedback on current and future ER needs
  - What are the latest challenges faced at ER sites?
  - What best practices have been applied?
  - What innovations have been adopted?

TECHNOLOGY TRANSFER ANNUAL SURVEY 2017

This survey is an important tool that Navy planners use for the early identification of challenges facing Remedial Project Managers (RPMs) and the Environmental Restoration Program (ERP). It also allows the Navy to direct technical support and training investments where they are needed most. Thank you for your input.

**1 Training**

The Department of the Navy (DON) ERP is left with many complex sites and issues.

1a. Which of the following topics would you like more training on to help guide you through the complex issues at ER sites (check all that apply):

- Natural attenuation strategies for groundwater
- PFAS site management
- Improved operation and maintenance (O&M) of pump-and-treat systems
- Sediment site management strategies
- Emerging contaminants
- PAHs in soil and sediment
- Heavy metals in soil and sediment
- Bioremediation
- Vapor intrusion
- Other (please list): \_\_\_\_\_

1b. Do you know of other training topics that could benefit RPMs and improve the ERP? (please specify below):

1c. In what format would you most prefer to receive additional ER training?

- Open Environmental Restoration Resource (OER2) Webinar
- Remediation Innovative Technology Seminar (RITS)
- RPM Training (Bi-Annual Event)
- In-Person Training for Project or Stakeholder Teams
- Topical Fact Sheets
- Other (please specify below): \_\_\_\_\_

# Feedback on T2 Formats from Survey

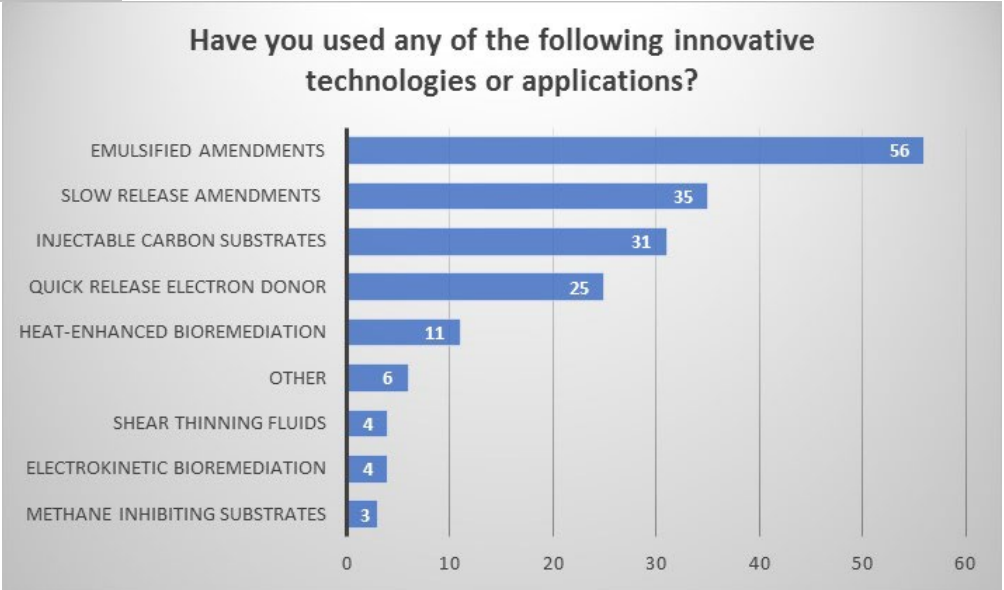

## Technology Transfer Formats

# Example T2 Survey Results: Technologies

## T2 Survey Results for Bioremediation

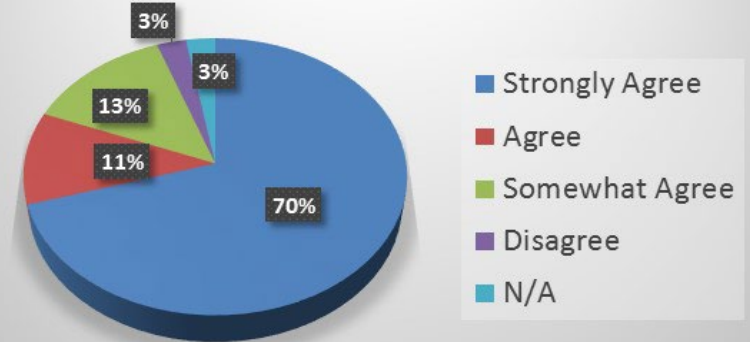

# Example T2 Survey Results: Technologies

## Use of Innovative Site Characterization & Remedial Technologies

- Site Characterization
  - Agree to Strongly Agree
  - 81% improved CSM
  - 78% reduced cleanup footprint
  
- Remedial Technologies
  - Agree to Strongly Agree
  - 74% reduced mass
  - 63% reduced remedial timeframe

**Key Point: Innovative Technologies  
Have Improved CSMs and  
Remediation**

The innovative technology improved the conceptual site model (CSM)

The innovative remedial technology reduced contaminant mass
